
A Residual falls with each step
relative preconditioned residual
GMRES steps (0 = preconditioner alone)
B The error falls with it
cross-section error eps_2
median, rho >= 1 (strong)
median, rho < 1 (weak)
GMRES steps (0 = preconditioner alone)
C Error against residual, all steps
eps_2
relative preconditioned residual
D Error per unit residual at the stopping point
eps_2 / residual at the stop
cases, sorted
E Pearson correlation falls with it
1 - r (Pearson)
GMRES steps (0 = preconditioner alone)
